Question 1: For subscribers who converted in January 2024, give us the name of the Telecom partner that led to acquiring the most new subscribers?

```
SELECT d.partner_id,  
       d.partner_name,  
       COUNT(subscriber_id)  
FROM fct_bundle_subscriptions AS f  
INNER JOIN dim_telecom_partners AS d  
USING (partner_id)  
WHERE conversion_date >= '2024-01-01' AND conversion_date < '2024-02-01'  
GROUP BY d.partner_id, d.partner_name  
ORDER BY 3 DESC  
LIMIT 1
```

Question 2: For each telecom partner, what is the longest number of days that a subscriber remained active after conversion and which bundle(s) did they subscribe on? For this analysis, only look at conversions between October 8th, 2024 and October 14th, 2024. If there are multiple bundles resulting in the same highest retention, return all the bundles.

```
WITH max_retention AS (  
  SELECT partner_id, MAX(retention_days) AS max_retention  
  FROM fct_bundle_subscriptions  
  WHERE conversion_date BETWEEN DATE '2024-10-08' AND DATE '2024-10-14'  
  GROUP BY partner_id  
)  
SELECT  
  f.partner_id,  
  d.partner_name,  
  f.bundle_id,  
  f.retention_days AS max_retention_days  
FROM fct_bundle_subscriptions f  
JOIN dim_telecom_partners d USING (partner_id)  
JOIN max_retention m  
  ON f.partner_id = m.partner_id AND f.retention_days = m.max_retention  
WHERE f.conversion_date BETWEEN DATE '2024-10-08' AND DATE '2024-10-14'  
ORDER BY f.partner_id;
```

Question 3: For subscribers who converted in November 2024, what is the average engagement score for each bundle within each telecom partner?

 How does each bundle's average engagement score compare to the all-time highest engagement score recorded by its respective telecom partner expressed as a percentage of that maximum?

```
with check_avg AS(
  SELECT partner_id, bundle_id, AVG(engagement_score) AS avg_score
  FROM fct_bundle_subscriptions
  WHERE conversion_date BETWEEN DATE '2024-11-01' AND DATE '2024-11-30'
  GROUP BY partner_id, bundle_id),

max_score AS(
  SELECT partner_id, MAX(engagement_score) AS maximum
  FROM fct_bundle_subscriptions
  GROUP BY partner_id)

SELECT c.partner_id,
       partner_name,
       bundle_id,
       avg_score AS avg_engagement_score,
       avg_score / maximum * 100.0 AS percentage_of_highest
FROM check_avg AS c
INNER JOIN max_score AS m ON c.partner_id = m.partner_id
INNER JOIN dim_telecom_partners AS d ON c.partner_id = d.partner_id
ORDER BY partner_name, avg_engagement_score DESC
```
