

Netflix

As a Data Analyst on the Netflix Mobile Experience team, you are investigating how users resume watching shows on mobile devices to enhance the seamless viewing experience....

Question 1: For the week from October 1st to October 7th, 2024, how many total resume events occurred on mobile devices? This analysis will help the Netflix Mobile Experience team evaluate overall user engagement during content resumption.

```
SELECT COUNT(*)  
FROM fct_user_resumptions  
WHERE resumption_timestamp >= '2024-10-01' AND resumption_time  
stamp < '2024-10-08'  
AND device_type IN ('iOS', 'Android')
```

Question 2: For October 2024, we want to analyze the distribution of resume events per user. Calculate the median, 90th percentile, and maximum number of resume events across users who had at least 1 resume event.

```
WITH resume_counts AS (  
    SELECT  
        user_id,  
        COUNT(*) AS resume_events  
    FROM fct_user_resumptions  
    WHERE resumption_timestamp >= DATE '2024-10-01'  
        AND resumption_timestamp < DATE '2024-11-01'  
    GROUP BY user_id)  
  
SELECT  
    PERCENTILE_CONT(0.5) WITHIN GROUP (ORDER BY resume_events)  
AS median_resume_events,  
    PERCENTILE_CONT(0.9) WITHIN GROUP (ORDER BY resume_events)  
AS p90_resume_events,  
    MAX(resume_events) AS max_resume_events  
FROM resume_counts;
```

Question 3: During the fourth quarter of 2024, which show titles generated the highest number of resume events on each device type?

```
WITH total AS(
  SELECT device_type,
         show_title,
         COUNT(*) AS total_events
  FROM fct_user_resumptions
  WHERE resumption_timestamp >= DATE '2024-10-01'
        AND resumption_timestamp < DATE '2025-01-01'
  GROUP BY device_type, show_title),

ranking AS(
  SELECT *, DENSE_RANK() OVER(PARTITION BY device_type ORDER BY
Y total_events DESC) AS rank_events
  FROM total)

SELECT device_type,
       show_title,
       LEFT(show_title,3) AS show_title_prefix,
       total_events
  FROM ranking
 WHERE rank_events = 1
```
