As a Product Analyst on the Influencer Growth team, you are tasked with analyzing the effectiveness of different content types in generating revenue per engagement....

Question 1: For each content type, what is the minimum revenue generated per engagement in the second quarter of 2024?

```
SELECT content_type,  
       MIN(revenue_generated::NUMERIC / NULLIF(engagement_count, 0)) AS min_revenue_per_engagement  
FROM fct_content_engagements AS f  
INNER JOIN dim_content_types AS d  
ON f.content_id = d.content_id  
WHERE engagement_date >= '2024-04-01' and engagement_date < '2024-07-01'  
GROUP BY content_type  
ORDER BY 2
```

Question 2: For each content type and each month, what is the minimum revenue generated per engagement in the second quarter of 2024?

```
SELECT content_type, TO_CHAR(engagement_date, 'MM') AS month_name,  
       MIN(revenue_generated::NUMERIC / NULLIF(engagement_count, 0)) AS min_revenue_per_engagement  
FROM fct_content_engagements AS f  
INNER JOIN dim_content_types AS d  
ON f.content_id = d.content_id  
WHERE engagement_date >= '2024-04-01' and engagement_date < '2024-07-01'  
GROUP BY content_type, TO_CHAR(engagement_date, 'MM')
```

As a Product Analyst on the Influencer Growth team, you are tasked with analyzing the effectiveness of different content types in generating revenue per engagement....

Question 3: For which content types, did we observe minimum revenue per engagement decline from April 2024 to May 2024, and then decline again from May 2024 to June 2024? This will help us identify content types that we might want to retire due to declining performance.

```
WITH min_revenue AS (
    SELECT
        content_type,
        TO_CHAR(engagement_date, 'MM') AS month_name,
        MIN(revenue_generated::NUMERIC / NULLIF(engagement_count, 0)) AS min_revenue_per_engagement
    FROM fct_content_engagements AS f
    INNER JOIN dim_content_types AS d
        ON f.content_id = d.content_id
    WHERE engagement_date >= '2024-04-01' AND engagement_date < '2024-07-01'
    GROUP BY content_type, TO_CHAR(engagement_date, 'MM')),

compare AS(
    SELECT
        a.content_type,
        a.min_revenue_per_engagement AS revenue_april,
        b.min_revenue_per_engagement AS revenue_may,
        c.min_revenue_per_engagement AS revenue_june
        -- (b.min_revenue_per_engagement - a.min_revenue_per_engagement) AS april_to_may_change,
