

As a Product Analyst for the X sports updates platform, your team is focused on enhancing user engagement with live sports content....

Question 1: What is the average duration of user interactions with live sports commentary during April 2024? Round the result to the nearest whole number.

```
SELECT ROUND(AVG(interaction_duration))  
FROM fct_user_interactions  
WHERE interaction_date BETWEEN '2024-04-01' AND '2024-04-30'  
AND content_type = 'live sports commentary'
```

Question 2: For the month of May 2024, determine the total number of users who interacted with live sports commentary and highlights. Ensure to include users who interacted with either or both content types.

```
SELECT COUNT(DISTINCT(user_id)) AS number_of_users
FROM fct_user_interactions AS f
WHERE TO_CHAR(interaction_date, 'YYYY-MM') = '2024-05'
      AND ((content_type = 'live sports commentary') OR (content_t
ype = 'highlights'))
```

Question 3: Identify the top 3 performing sports categories for live sports commentary based on user engagement in May 2024.
Focus on those with the highest total interaction time.

```
with total AS(  
  SELECT category_id, SUM(interaction_duration) AS total_times  
  FROM fct_user_interactions  
  WHERE TO_CHAR(interaction_date, 'YYYY-MM') = '2024-05'  
    AND content_type = 'live sports commentary'  
  GROUP BY category_id)  
  
SELECT category_name, total_times  
FROM dim_sports_categories AS d  
INNER JOIN total  
ON d.category_id = total.category_id  
ORDER BY 2 DESC  
LIMIT 3
```
