

# Stripe

As a Data Analyst on the Stripe Connect team, you are tasked with evaluating payment performance across various marketplace segments....

Question 1: What is the average payout fee per transaction for each marketplace segment during April 2024? This result will provide an initial benchmark for fee structures by segment.

```
SELECT marketplace_segment, AVG(payout_fee) AS average_payout_
fee
FROM fct_transactions
WHERE transaction_date >= '2024-04-01' AND transaction_date <
'2024-05-01'
GROUP BY marketplace_segment
```

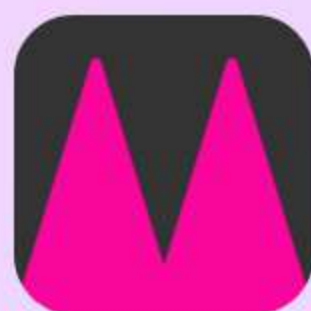

# Stripe

As a Data Analyst on the Stripe Connect team, you are tasked with evaluating payment performance across various marketplace segments....

Question 2: For each marketplace segment, what is the total compliance costs in April 2024? This metric will help evaluate the efficiency of current compliance strategies.

```
SELECT marketplace_segment, SUM(compliance_cost) AS total_compliance_costs
FROM fct_transactions
WHERE transaction_date >= '2024-04-01' AND transaction_date < '2024-05-01'
GROUP BY marketplace_segment
```

# Stripe

As a Data Analyst on the Stripe Connect team, you are tasked with evaluating payment performance across various marketplace segments....

Question 3: We know that one of the marketplace segments exhibited both the lowest total compliance overhead and the lowest average payout fee structures in April 2024. Can you identify which one it is?

```
with calculate AS(
  SELECT marketplace_segment,
         AVG(payout_fee) AS average_payout_fee,
         SUM(compliance_cost) AS total_compliance_costs
  FROM fct_transactions
  WHERE transaction_date >= '2024-04-01' AND transaction_date
< '2024-05-01'
  GROUP BY marketplace_segment),

ranking AS(
  SELECT *,
         RANK() OVER(ORDER BY average_payout_fee) AS rank_fee,
         RANK() OVER(ORDER BY total_compliance_costs) AS rank_cost
  FROM calculate)

SELECT *
FROM ranking
WHERE rank_fee = 1 AND rank_cost = 1
```
