

# Apple

As a Data Analyst on Apple's Corporate Social Responsibility team, you are tasked with evaluating the effectiveness of recent philanthropic initiatives....

Question 1: Apple's Corporate Social Responsibility team wants a summary report of philanthropic initiatives in January 2024. Please compile a report that aggregates participant numbers by community and by program.

```
SELECT f.community_id, program_id, SUM(participants) AS total_
participants
FROM fct_philanthropic_initiatives AS f
INNER JOIN dim_community AS d
ON f.community_id = d.community_id
WHERE event_date >= '2024-01-01' AND event_date < '2024-02-01'
GROUP BY f.community_id, program_id
ORDER BY 3 DESC
```

Question 2: The team is reviewing the execution of February 2024 philanthropic programs. For each initiative, provide details along with the earliest event date recorded within each program campaign to understand start timings.

```
SELECT program_id, program_name, MIN(event_date) AS earliest_event_date
FROM fct_philanthropic_initiatives
WHERE event_date >= '2024-02-01' AND event_date < '2024-03-01'
GROUP BY program_id, program_name
```

Question 3: For a refined analysis of initiatives held during the first week of March 2024, include for each program the maximum participation count recorded in any event. This information will help highlight the highest engagement levels within each campaign.

```
SELECT program_id, program_name, MAX(participants) AS max_participation
FROM fct_philanthropic_initiatives
WHERE event_date >= '2024-03-01' AND event_date <= '2024-03-07'
GROUP BY program_id, program_name
```
