You are a Product Analyst on the Venmo social payments team investigating how social sharing behaviors influence user engagement and retention....

Question 1: What is the floor value of the average number of transactions per user made between October 1st, 2024 and December 31st, 2024? This helps establish a baseline for user engagement on Venmo.

```
SELECT FLOOR(AVG(avg_number_transactions))
FROM (
    SELECT user_id,
           COUNT(transaction_id) AS avg_number_transactions
    FROM fct_transactions
    WHERE transaction_date BETWEEN '2024-10-01' AND '2024-12-31'
    GROUP BY user_id
) AS total;
```

Question 2: How many distinct users executed at least one social share between October 1st, 2024 and December 31st, 2024? This helps assess the prevalence of social sharing among active users.

```
SELECT COUNT(DISTINCT(user_id)) AS unique_user
FROM fct_social_shares
WHERE share_date BETWEEN '2024-10-01' AND '2024-12-31'
```

Question 3: What is the average difference in days between a user's first and last transactions from October 1st, 2024 to December 31st, 2024, for users who made 2 transactions vs. 3+ transactions?

```
with total AS(
  SELECT user_id,
         CASE WHEN COUNT(*) = 2 THEN '2 transactions'
              WHEN COUNT(*) >= 3 THEN '3+ transactions'
              ELSE '<2 Transactions' END AS number_transactions,
         MIN(transaction_date), MAX(transaction_date),
         MAX(transaction_date) - MIN(transaction_date) AS datediff
  FROM fct_transactions
  WHERE transaction_date BETWEEN '2024-10-01' AND '2024-12-31'
  GROUP BY user_id)

SELECT number_transactions, AVG(datediff) AS difference_in_days
FROM total
WHERE number_transactions != '<2 Transactions'
GROUP BY number_transactions
```
